

Keywords: *transdisciplinarity, multidisciplinarity, interdisciplinarity*

Abstract: It is difficult for us to understand why "joint problem solving" must be the unique aim of transdisciplinarity. It is certainly one of the aims but not the only aim. The use of singular seems to us dangerous, as in religion, as allowing unnecessary wars and unproductive dogmatism. Is transdisciplinarity concerning only society, as a uniform whole, or, in the first place, the human being which is (or has to be) in the center of any civilized society? Are we allowed to identify *knowledge* with *production of knowledge*? Why the potential of transdisciplinarity has to be reduced to produce "better science"? Why transdisciplinarity has to be reduced to "hard science"? In other words, the Subject - Object interaction seems to us to be at the very core of transdisciplinarity and not the Object alone.
